What was good about the session? (comments)

- Getting to see what my child was learning in class
- Good insights into seeing the school classroom and also how methods have changed since I was at school.
- Good to see a few recap questions and how children show their working out. Good chance to see child in classroom environment and how they would answer SAT style questions. The session was very beneficial for both parents/children.
- Seeing my child working & working out the answers
- It was lovely to see exactly where my child was at with their education
- It was catered for learning. It gave a good insight to what the children were learning and also showed the amount of effort and support the children are receiving with different learning stages.
- The teacher was great. Clear and confident. Interacted with all the kids. It was good to see how well the kids done.
- Seeing how the class reacts to their teacher and how engaged they are.
- I could see where my child needs a little help
- Got to see how the key maths subjects are taught
- Seeing her thought process to tackle questions
- It was good seeing the children work
- Able to understand the teaching methods in order to help at home
- To see how the children get from the question to the answer, including the working out. I also enjoyed seeing the interaction between teachers and students.
- It was really enjoyable to see my child in her daily setting at school and to get an insight to the maths work being done in class.
- Seeing how maths is delivered
- It was good to get an idea how their maths is taught at school, which will make it easier to help/practise maths at home
- Get to know what are they doing in class. How much he is engaged in lessons, and his understanding of what teachers saying.
- Different ways to learn times tables.

- I got to see how well my child is doing and what areas we could improve on at home
- The methods the teacher uses in delivering her lessons across to the pupils
- Fun and easy to follow
- Brilliant teacher coaching of pupils on maths subject and made it fun for the pupils, without any undue pressure on the pupils
- Absolutely everything! Brilliant watching the children putting what they are learning into practice.
- It was good to see how the children worked
- Seeing the way my child is taught and how happy she is!
- Being able to see how he interacts with the class and to be able to see the work they do
- It was lovely to get a snapshot of what maths lessons are like and what I can be helping him with at home. I thought it was nice to do activities all together :-)
- Lovely to see how engaged the kids were
- The interaction using numbers. Great seeing all the children learning with a smile on their faces
- Seeing the activities they do and getting ideas for home too
- Everybody will learn maths easily
- Really nice to see the school and class environment.
- It was good to see how they learn maths. So i can adopt the techniques at home
- Seeing the interesting ways of teaching maths and how the children enjoyed it.
- Students will learn maths easily
- Love seeing the variety of tasks. My son is exposed to the different types of learning the creativity, the environment that he's in on a daily basis along with all the other teachers and children. It was a really good insight for me as a parent
- Interacting with my child at school and seeing what his lesson entails
- Being able to see how he is at school, nice to see him happy whilst learning
- Everything
- Being able to see my child in their own environment confidently learning and problem solving. Also seeing the children sing and do their prayers was wonderful.
